Stakeholder involved (e.g. other experts, policymakers, scientists, farmers, extension services or stakeholders)	policy makers, scientists, farmers, food producers, authorities, NGO's, other experts
Number of participants	32

Outcomes

Objectives:

- > Connecting stakeholders from the field of biodiversity-management and marketing from the countries Croatia, Czech Republic, Hungary, Slovakia and Slovenia
- > Defining problems connected to the production and marketing derived from conserved plant genetic resources
- > Demonstrating best practice examples from different countries
- > Developing solutions to existing problems and ways to institutionalize the process

Positive and negative points (strengths and weaknesses)

- + Exchange of experiences of participants from neighbouring countries
- + Actors with different backgrounds get to know other perspectives
- + Many participants from ministries and seed/variety registration authorities
- Few participants from farming

Relevance

This workshop was the first in a series of 9-10 workshops covering many EU, EFTA and Western Balkan countries which will raise awareness for the topic.

Perspectives

The aim of the workshop is to develop options and models of proactive regulation together with the involved stakeholders to enable more products based on the conservation and development of plant genetic resources.
